This extensive collection of information and resource materials about North American Indians includes: (1) "A General Introduction to North American Indian Art"; (2) "Selected References on Native American Silverwork"; (3) "Selected References on Southwestern Native American Pottery"; (4) "Selected References on Southwestern Indian Textiles and Weaving"; (5) "Selected References on Native American Women"; (6) "Selected References on Native American Symbolism and Design"; (7) "Native Peoples of the Americas: Photographs of Exhibits in the Museum of Natural History"; (8) "Native American Resources: Books, Magazines, and Guides"; (9) "Selected References on Native American Games, Dances, and Crafts"; (10) "Selected References on Native American Indian Food"; (11) "Selected References Relevant to European and Native American Contact"; (12) "Introductory Bibliography on North American Indians"; (13) "Selected Photographs Illustrating North American Indian Life From the National Anthropological Archives"; (14) Selected Portraits of Prominent North American Indians"; (15) "American Indian Languages"; (16) "North American Indians: Bibliographies, Films, Curriculum Units, and Other Teaching Materials"; (17) "Native American Questions and Answers"; (18) "Origin of the American Indians"; and (19) "Erasing Native American Stereotypes." A teaching activity also is included, with instructions for a class on "North American Myths and Legends."
North American Indians: A Collection of Bibliographies, Resource Lists, Questions and Answers, and Other Leaflets
Prepared by the National Museum of Natural History.

National Museum of Natural History
Smithsonian Institution
Washington, D.C.

1994
Dear Elementary or Secondary School Teacher:

The Department of Anthropology receives numerous requests for classroom teaching materials on Native Americans. The department does not specifically prepare curriculum units but does have free information: leaflets, bibliographies, and a newsletter. This Teacher's Resource Guide includes a "Bibliography for Teachers and Students on North American Indians" containing a listing of films and curriculum activities in addition to suggested books. Enclosed you will also find information on ordering photographs of North American Indians from the Smithsonian Institution's National Anthropological Archives and photographs of the Native American exhibits at the National Museum of Natural History.

Two publications the Smithsonian Institution produces for teachers are AnthroNotes and Art to Zoo. AnthroNotes, a National Museum of Natural History Newsletter for Teachers, is distributed by the Department of Anthropology. Published three times a year, the newsletter includes feature articles on current anthropological research, teaching activities for the classroom, summer fieldwork opportunities for teachers and students, and new resources. To be placed on the mailing list, write: Anthropology Outreach and Public Information Office, National Museum of Natural History MRC 112, Smithsonian Institution, Washington, DC 20560. Art to Zoo, a publication for elementary school teachers, is based on Smithsonian collections and includes ideas for teaching activities and descriptions of Smithsonian scientists and exhibits. To receive this publication, write to the Office of Elementary and Secondary Education, Arts & Industries Bldg. 1163, MRC 402, Smithsonian Institution, Washington, DC 20560. The OESE also publishes Smithsonian's Resource Guide for Teachers, a comprehensive listing of educational materials available from the Smithsonian relating to the social sciences, arts, and sciences. For a free copy, write to the above address.

Many of our inquiries concern available publications in the field of anthropology. The leaflet "Anthropological Materials Available from the Smithsonian" includes a listing of Smithsonian Press publications, some of which deal with North American Indians, including reprints of a few of the publications produced by the former Bureau of American Ethnology. The leaflet also describes the Handbook of North American Indians, an encyclopedia summarizing knowledge about all Native Peoples north of Mesoamerica, and lists the volumes published thus far. Many of the past publications of the Department of Anthropology and the Bureau of American Ethnology (which terminated in 1965) are currently available from University Microfilms, Inc., 300 N. Zeeb Rd., Ann Arbor, Michigan 48106; 1-800-521-0600 ext. 221.

If you have not already done so, we recommend that you investigate the resources of your city and state museums and historical and archeological societies. These organizations are often involved in education programs and can provide useful information.

The Bureau of Indian Affairs has available an informative booklet, which includes a bibliography, titled American Indians Today: Answers to Your Questions. Write: Bureau of Indian Affairs, Public Information Office, Department of the Interior, Washington, DC 20245. The Indian Arts and Crafts Board publishes a source directory of Native American owned and operated arts and crafts businesses. For this directory, write: Indian Arts and Crafts Board, Room 4004, Department of the Interior, Washington, DC 20240. A map of Indian reservations is available from the U.S. Geological Survey, Box 25286, Federal Center, Denver, CO 80225; (303) 236-7477. The cost is $2.75 each for orders of less than 10.
Recordings of and information about American Indian music can be obtained from the following organizations: Archive of Folk Song, Library of Congress, Washington, DC 20540; Canyon Records, 4143 N. Sixteenth St., Phoenix, AZ 85016; Folkway Records, c/o Birch Tree Group, 180 Alexander St., Princeton, NJ 08540; and Indian House, P.O. Box 472, Taos, NM 87571.

The National Geographic Society is another source of information on North American Indians. The Society produces films, publications, and the map "Indians of North America." For a listing of their materials, write National Geographic Society, P.O. Box 2806, Washington, DC 20013.

If your class plans on visiting the National Museum of Natural History, a tour through the Native American exhibits can be arranged by writing to the Office of Education, National Museum of Natural History, MRC 158, Smithsonian Institution, Washington, DC 20560.

We hope you find this resource guide useful in your teaching about American Indians.

SELECTED BIBLIOGRAPHY ON NATIVE AMERICAN WOMEN

These ethnohistorical articles critique past works that have examined images of Plains Indian women, their work, status, and female identity, and reassess findings in light of new developments in anthropology and women's studies.

Description and analysis of Navajo and Apache girl's puberty rituals.

Autobiographies and narrative techniques are examined to reflect Indian women's literary tradition and changing roles.

A fascinating life history of a 71 year-old Inupiaq woman, born of an Eskimo mother and White father, describing her involvement with her community as teacher and magistrate as well as her roles as wife and mother.

An engaging oral history of a Haida woman, born in 1896 off the coast of British Columbia, providing considerable information about Haida culture.

Narratives of life in the early 20th century describe the conflict between traditional Pomo and white ways.

Contemporary account of reservation life, Indian politics, traditional tribal ways, and growing up Sioux in the 60s, 70s, and 80s.

Brief biographical sketches of Native American women leaders.

Anthropological study of puberty ceremonies focusing on performance aspects such as song, dance, and narration.

This most recent bibliography contains about 700 briefly annotated citations.

Sketches lives of eighteen celebrated Indian women including Pocahontas, Pablita Velarde, and the Tallchief sisters.

Compiled by Sanapia's "adopted" son, this detailed bibliography describes the cultural and social aspects of Sanapia's role as Medicine woman.

Narratives of four ordinary Yaqui women with a lengthy introduction discussing the editor's methodology and background of the Yaqui people.

Classic ethnographic life histories of three women include family relationships and marriage practices.

Seventy-four-year-old Pretty Shield recounts her life experiences and laments the loss of traditional ways.

Narrative describes Winnebago life from traditional hunting and ceremonial practices to the period of White bureaucratic dominance.

One of the first major studies to explore family life and the dynamic role of women.

Critical analysis of past approaches and studies of Indian women in light of contemporary findings.

Well-written and well-researched description of American Indian women based on historical records and recollections by contemporary Indian women. Topics include childbirth, growing up, coming-of-age, marriage, women's economic roles, women and power, and women and war.

Ethnographic study that considers the whole context of Oglala life--such as religion, economics, medicine, political life, old age--explores the complementary roles of men and women in Oglala society.

Describes historical roles of American Indian women from various cultural groups.

Originally published as a memoir in 1936, Marie Concha's lyrical narrative (given at the age of 90) recounts her dynamic, traditional life.

Life of a Mohawk poet, actress and cultural leader.

Building on Rayna Green's 1983 survey, Welch's study identifies key works, trends and future directions.
SELECTED REFERENCES ON NATIVE AMERICAN SYMBOLISM AND DESIGN

Bunzel, Ruth L. The Pueblo Potter. New York: Columbia University Contributions to Anthropology, No. 8, 1929. (Contains a chapter dealing specifically with symbolism)

Caraway, Caren. Plains Indians Designs. New York: Doubleday, 1984. (Discusses the designs used by the Crow, the Blackfoot, the Comanche, the Pawnee, and the Apache, among others)

Denver Art Museum. Indian Leaflet Series. Denver: Denver Art Museum. (Leaflets provide information on and illustrations of Native American designs and color use. Specific leaflets are Colors in Indian Arts: Their Sources and Uses (#56), Symbolism in Indian Art and the Difficulties of its Interpretation (#61), and Red-Dark-Light in Designs (#114). Write: Denver Art Museum, 100 14th Ave. Parkway, Denver, CO 80204)

Peet, Stephen D. Native American Symbolism. American Antiquarian, Vol. 7, No. 3., 1885. (Older but excellent work on symbol use)

The American Indian. 3rd ed. New York: Doubleday, 1938. (Contains a general discussion of symbolism in design)

In addition to the references listed above, most introductory texts on Native American art contain information on symbolism and design motifs. Care should be taken, however, in making symbolic interpretations as many designs have personal rather than tribal meaning.

NATIVE AMERICAN RESOURCES: BOOKS, MAGAZINES, AND GUIDES

Elementary school explorations of Native American cultures too often focus on traditional arts and crafts—making tipis, totem poles, baskets, pottery, and bows and arrows. Unconscious stereotypes persist so that, in the minds of students, North American Indians and Eskimos still live as they did in the 1700's. Any real understanding of many different peoples with distinctive cultures never emerges. Fortunately, there are some books and classroom materials that can help correct such biases as well as provide rich learning experiences. The reading level of these materials ranges from kindergarten through ninth grade.

BOOKS

A readable, caring history of the Cheyenne is told movingly from their viewpoint. The book also chronicles why the Tribal Council voted in 1973 to cancel all Northern Cheyenne coal leases and exploration permits, and why, instead, the tribe itself is trying to exploit possible oil and gas reserves on their land.

Between 1870 and 1890, George B. Grinnell collected these dramatic tales which come from the Pawnee of Kansas and Nebraska, the Blackfeet of Montana, and the Cheyenne of Wyoming and Colorado. The aptly illustrated and engaging stories reflect the world of Plains Indian peoples, their hunting methods, family lives, warfare, values, and beliefs.

The important role music played among all North American tribes is described with illustrative musical examples from the late 18th century to today, from the major culture areas of North America. Both of Bierhorst's books include bibliographies of other excellent works, including Bierhorst's earlier works.

A beautifully retold legend from the Comanche people in which a young girl gives up her beloved doll to save her people, and in return they receive the gift of the bluebonnet flower.

Vivid colored pictures dominate the text that describes Navajo history, land, and traditional and present lifestyles. At times the writing is simplistic, but the book provides the Navajo viewpoint that is often missing from books on Native Americans. In addition, contemporary issues such as strip mining, oil and gas mining, health problems, education, and housing standards are discussed.

This beautifully told tale is based on a legend from the Great Plains and is richly illustrated by the author. Goble has written other highly recommended books for young people such as the 1979 Caldecott Medal winner The Girl Who Loved Wild Horses, and has illustrated many other fine collections such as The Sound of Flutes and Other Indian Legends, transcribed and edited by Richard Erdoes (New York: Pantheon Books, 1976), appropriate for grades 4-9.

Through the descriptions of daily life of a representative Eskimo family living near the Bering Sea today, the book not only introduces Eskimo culture as it was and is, but also portrays the conflicts between subsistence hunting and fishing and the prevalent cash economy. The reader learns how each family member lives, how school, sports, and religion are arenas for value conflicts, and what resolutions have been found.

Since the well-known 1973 book by Theodora Kroeber (Ishi, Last of His Tribe) is too difficult for younger students, Meyer's book provides an authentic and engaging narrative for elementary school children. The book recreates Ishi's childhood, describing the arts and skills he used, how the Yahiis were slowly decimated over the years, and what Ishi's life was like once he came out of hiding and was befriended by anthropologist Alfred Kroeber. In this excellent series, Dillon Press also publishes books on Crazy Horse, Maria Martinez, Chief Joseph, Sacagawea, Sitting Bull, Tecumseh, and Jim Thorpe.

A captivating story about the people in Bethlehem, Pennsylvania, and the Delaware Indians, and how trombones kept peace between them during the French and Indian War.

Beautifully illustrated in color, Song of Sedna retells in detail the powerful, ancient Eskimo legend of Sedna, and how she came to rule the seas. The book can be usefully compared to the also highly recommended version by Beverly McDermot (Sedna, New York: Viking Press, 1975), which is illustrated in dramatic indigo and violet block print drawings, and is geared for the same age group. Also recommended is San Souci's earlier book, The Legend of Scarface (New York: Doubleday, 1978).

This recent collection of oral history stories and legends from Southwestern Alaska reflects the changing culture of Alaska's native peoples. The stories were collected by students interviewing older residents in their communities.

Illustrated with attractive pencil drawings, this detailed study demonstrates the structural sophistication of the Tipi, the aesthetic and spiritual significance of its design and decoration, and the central role it played in the adaptation of the Plains Indian peoples.

**MAGAZINES**

Recently an entire issue focused on one cultural group, the Cherokee (February 1984). Other issues also include articles on Native Americans. An excellent magazine geared for ages 8-14.

This new magazine, geared for ages 8-14, is published by Cobblestone Publishing Co., in cooperation with the American Museum of Natural History. The second issue highlights the Pueblo peoples, and the third issue includes an article on the Alaskan Eskimos. The subject of *Faces* is human life the world over covering a wide range of topics in cultural anthropology and archeology.

**GUIDES**

*Guidelines for Evaluating Textbooks from an American Indian Perspective.* Report No. 143. National Education Improvement Center, Education Program Division, $5.00. To order write: Publications Department, Educational Commission of the States, Suite 300, 1860 Lincoln St., Denver, CO 80295; (303) 830-3820.

Gilliland, Hap. *Indian Children's Books.* Montana Council for Indian Education, 3311 1/2 Fourth Avenue North, Billings, MT 59012, 1980, $7.95 PB.

An annotated list of books about American Indians for children, arranged by title with indexes by tribe, region, and subject. The annotations have been largely written by Native Americans or by evaluators who work with Native American children and include judgments concerning historical and cultural accuracy and suitability for use with Native Americans.

An older but still useful resource which includes many classroom activity and role playing suggestions as well as guidelines for sensitizing students to stereotypes.

(Originally published in the Fall 1984 issue of AnthroNotes)
SELECTED REFERENCES ON NATIVE AMERICAN GAMES, DANCES, AND CRAFTS

Epstein, Roslyn. American Indian Needlepoint Designs for Pillows, Belts, Handbags, and other projects. Webster Groves, MO: American Indian Books, 1984. (Designs are accompanied by an explanation of their symbolic meaning.)

ANTHROPOLOGY OUTREACH AND PUBLIC INFORMATION OFFICE DEPARTMENT OF ANTHROPOLOGY SMITHSONIAN INSTITUTION
SECTION I. BASIC RESOURCES

*Indians of North America.* Edited by Frank W. Porter III. Broomall, PA: Chelsea House Publishers. 1987-

A series of over 50 short books written at the high school level, each by a historian or anthropologist. Most volumes devoted to a single tribe's history and culture.

A nearly complete listing of serious published accounts of Native American cultures, with many histories also included. Each volume organized by geographic areas and tribal groups. Tribal maps are included but no annotation and no topical indexes.

Annotated bibliographies prepared for various areas and tribal groups. Each volume includes an introductory bibliographic essay with citations to the alphabetical listing of books which follows. Two other lists are included: five titles for the beginner and 15-20 titles constituting a basic library collection in that field. Asterisks in the longer alphabetical listing denote works suitable for secondary school students.

Covers entire large library—thus far more than North American Indians—but has very useful subject breakdown and full listing by author. Includes articles in anthropological journals as well as books and monographs. Supplements bring coverage up to 1979.

Contains 109 excellent maps dealing with the distribution and history of the U.S. Indian populations, land sessions, and the Indian wars.

Includes a detailed subject breakdown to mostly historical sources.

A 20 volume encyclopedia summarizing knowledge about all Native peoples north of Mesoamerica, including cultures, languages, history, prehistory, and human biology. Standard reference work for anthropologists, historians, students, and the general public. Chapters by authorities on each topic, including one on each tribe in the area. Heavily illustrated, extensive bibliographies, well indexed. Each volume may be purchased and used independently.

SECTION II. GENERAL WORKS

In examining how the White image of the Indian "as separate and single other" developed and persisted over time, the author illuminates contemporary views of Indian people as well. The book analyzes the stereotypes and images developed through the centuries by settlers, intellectuals, writers, artists, and government leaders.

Excellent popular history with a large and important collection of illustrations, particularly early non-photographic representations of Indians. Focus on the relations between Indians and Europeans from the beginning until the 1890's.

Readable historical survey covering the first arrival through the impact of European contact, up to the modern reservation system.

College text book, extremely detailed, densely factual, with numerous maps. Differs from all other modern treatments in being arranged by topic rather than by regions and cultures.

Condensed, popular accounts of the Indians of North, Central, and South America. From the time of man's emergence in the New World through recent times. Some illustrations and a good bibliography.

A collection of case study essays with a focus on recent Indian history and the pattern of Indian-White relations.

Useful collection of chapters by anthropological experts on the culture and history of representative tribes in each region of Canada.

Good college textbook. Treats in considerable detail a few tribes chosen as typical examples of various regions. Not a continental or areal summary.

College textbook surveys archeology, historic and modern cultures, region by region, with selected tribes treated in more detail. Written by well chosen specialists. Poor illustrations.

Many, well-illustrated depictions of North American Indian scenes and artifacts, fictional and real, with good explanatory text.

Popular general account with summaries of traditional culture areas.

Historical account focusing on the impact of European settlement on Indian cultures. Organized chronologically, from Colonial to modern times.

This 160-page work contains hundreds of colored drawings of well-identified traditional objects and techniques, with a brief authoritative descriptive text.

SECTION III. PREHISTORY

Introductory college text emphasizing culture change through time.

A collection of in-depth but non-technical essays by well-known scholars. Each essay an account of the prehistory of a culture area in North, Central, and South America.

Bibliography of up-to-date and nontechnical summaries and collected readings. Emphasis on history rather than archeological method.

Examines mythical and religious theories regarding the origins of American Indians, in contrast to archeological method and evidence.

SECTION IV. NORTH AMERICAN INDIAN HISTORY

Farber's photographic record, organized by geographic area. Brief historical text by Dorris, with useful maps showing towns and reservations with sizeable Indian populations.

Unlike Josephy's Patriot Chiefs which portrays war chief's resistance to White culture as "logical patriotic struggle of Indian people against oppression," Edmunds' book treats other leaders of heroic stature, reflecting the diversity of Indian leadership patterns. Book does not focus entirely on Indian-White relations, but on Indian cultural developments.

Three hundred photographs offer a unique record of the Indians of North America as seen by the early photographers. Many of the photographs taken from the Smithsonian's Bureau of American Ethnology collection have never before been published.

A personal account of the Indian occupation of Alcatraz from November 20, 1969 to June 11, 1971. The author, one of the leading organizers of the occupation, describes the events that led up to the takeover; the role of the media; the factionalism that arose among the Indians involved; the removal; and the impact the invasion had on the public's understanding of Indian problems, on government policies regarding Indians, and on the renewal of Indian pride.

Traces Indian-White relations from the Colonial period to the 1950's with an emphasis on the U.S. governmental policy.

Nine chapters, chronologically organized, revolve around Indian patriots such as Pontiac, Tecumseh, and Chief Joseph. Subjects from a wide selection of cultures, time periods, and geographic areas.

Written by an Indian historian, this survey of Indian experience on the American continent is sensitively recounted and well-documented from both Indian and non-Indian sources.

Unusual approach with a broad perspective on the interaction of three major cultures-European, Native American, and African in pre-revolutionary America.

An intellectual historian's analysis of the belief in "savageism" and "civilization" as reflected in American writings (political pamphlets, missionaries' reports, drama, poetry, novels and anthropologists' accounts.) on the Indian, primarily from the Revolution through the Civil War.

This clearly written work traces the history and organization of the Bureau of Indian Affairs, with the emphasis on the changing Indian policy over the decades.

Short paperback with selected readings on Indian-White relations, by prominent historians.

Historical summary from the viewpoint of Indian cultural development and Indian-Indian relations. Second half of book is a collection of documents divided into four sections: Indian History as seen by Indians, White Policy, White Viewpoints, Indian Prophets and Spokesmen.

6

Amply illustrated volume. First part focuses on the Indian-White conflict in the East (1492-1850), second half deals with the Western battles, ending with the Battle of Wounded Knee in 1980.

Chronologically organized with brief historical summaries, followed by documents illustrating significant events and conditions including pieces by Indians. Appendices include lists of Museums, Government Agencies, Indian Organizations and Publications, Audio-Visual aids, and brief biographies of prominent Indians of the past and present.

Extensive collection of documents tracing the evolution of the special legal relationship the American Indians have with the U.S. Government. Material from five principal sources: reports of the Commissioners of Indian Affairs, Congressional debates, judicial decisions, treaties, and acts of Congress.

SECTION V. MODERN CONDITIONS

Historical background of events and ideas to the November 1972 Twenty Points presented by the Indians to the U.S. government to help solve their problems. A Call for a new legal framework with the federal government.

Polemical discussion of the Indians' situation, vis a vis lawyers, anthropologists, government agents, religious missionaries and Indian leaders.

Outspoken, argumentative attack on much in American society, including liberals and the Civil Rights Movement, and a call to return to a simpler life style: "...the ultimate irony is that the White man must drop his dollar-chasing civilization and return to a simple, tribal, game-hunting, berry-picking life if he is to survive."

An overview on contemporary American Indian issues such as health, education, urban living, legal, and economic, with a brief history of legal and territorial conflicts between Native Americans and the U.S. government.

Essays by anthropologists providing historical background and seven current case studies. Attempt to see Indian problems from the Indian point of view.

Adaptation of Indian cultures through time with a review of recent government policy and contemporary Indian movements and organizations.

Problems of economic development in seven tribes written by anthropologists and Indians with a concluding comparative analysis by the editor.

An attempt to "translate the thoughts of the Indians into the words of the White man," especially the words of the new leaders of the 1960's and 1970's such as Vine Deloria, Jr. from the National Congress of American Indians.

Sociological studies focusing primarily but not exclusively on the contemporary situation. Introductory essay discusses demography, socio-cultural change, religious movements, social contact, economic issues, and the family.

Seven essays, written by Native Americans, examine contemporary American Indian identity. Among the topics are: adaptability and practicality of country-western dress and the pickup truck; the development of the middle-class; American Indian studies programs; and the historian's role in using both Indian and non-Indian sources, some of which may be considered sacred information by Native people.
SELECTED PHOTOGRAPHS ILLUSTRATING
NORTH AMERICAN INDIAN LIFE
FROM THE NATIONAL ANTHROPOLOGICAL ARCHIVES

This list includes scenes of North American Indian life that are frequently requested from the National Anthropological Archives. The photographs were selected from a reference file of twenty thousand Indian portraits and scenes specifically to illustrate the variety of habitation, dress, food preparation, work, and play in different cultural areas.

Listed photographs are available as 8-by 10-inch black and white glossy or matte prints for $15 each. Payment must be submitted in advance. To place an order, send the Archives a check or money order payable to the Smithsonian Institution and a list of the photo numbers of the item desired.

The National Anthropological Archives has many other photographs that depict Indians and other peoples of the world. These photographs can be examined in the Archives by researchers between 9:00 a.m. and 5:00 p.m., Monday through Friday, national holidays excepted. Since the material is diverse and public access to some of it is restricted, it is advisable to contact the Archives well in advance of a visit, in order to obtain information about the use of specific material. The address is National Anthropological Archives, National Museum of Natural History, 10th Street and Constitution Avenue, N.W., Washington, D.C. 20560. The telephone number is (202) 357-1976.

42,265    Three Apache men with bows and arrows.

45,987-C Apache men playing hoop and pole game, San Carlos, Arizona, 1899 or before.

55,440    Navajo men shearing sheep.

56,955    Woman drying peaches, Isleta, New Mexico, 1900.
SELECTED PORTRAITS OF PROMINENT
NORTH AMERICAN INDIANS

This list includes prominent North American Indians whose portraits are
most frequently requested from the National Anthropological Archives.
In cases where the Archives has more than one portrait of an individual,
esthetic considerations and the quality of the print have determined the
choice of item included here. Unless otherwise indicated, all of the portraits
are photographs taken from life. No portraits of Cochise, Tazi (Taza),
Mangas Coloradas, Massasoit, or Pontiac are in the Archives. To our
knowledge, no authentic portrait of Crazy Horse exists.

Portraits are available in 8- by 10-inch black and white glossy or matte
prints for $15 each. Payment must be submitted in advance. To place an
order, a check or money order payable to the Smithsonian Institution should
be sent to the Archives along with an indication of the photo number of the
material desired.

The National Anthropological Archives has many other photographs that
depict Indians and non-Indians and aspects of their cultures. These photo-
graphs can be examined in the Archives by serious researchers between
9:00 a.m. and 5:00 p.m., Monday through Friday, national holidays
excepted. Since the material is diverse and public access to some of it is
restricted, it is advisable to contact the Archives well in advance of a visit
in order to obtain information about the use of specific material. The
address is National Anthropological Archives, National Museum of
Natural History, 10th Street and Constitution Avenue, N.W., Washington,
D.C. 20560. The telephone number is (202) 357-1976.

AMERICAN INDIAN LANGUAGES

In 1492 there were at least 350 different languages spoken by the Native Americans north of Mexico, including Eskimos and Aleuts, and perhaps some 1,500 languages spoken in Mexico and Central and South America. These are totals of separate languages—not dialects. The speakers of one such language could not understand any of the other languages without special learning. If one included the different dialects of each of these languages, the totals would be much greater. As a general rule, most Indian groups known to us as separate tribes spoke separate languages. Presently, about 200 languages survive in North America, perhaps 275 in South America, and many more in Central America and Mexico.

Many Indian languages are related (in the same manner as, for examples, English, German, French, Greek, and Russian are related), going back ultimately to a single ancestral language. Languages related in this way belong to a single language family (English is a member of the Indo-European family). There were about sixty such families north of Mexico and an even larger number in Latin America. Some linguists have tried to find remoter relationships among many of these families and have grouped them into more inclusive units sometimes called stocks. One influential classification grouped all of the languages of North America into six stocks, but recently specialists have questioned the validity of studying such larger units of relationship before the histories of the individual families are understood. The wide diversity that exists among many of the American Indian languages can be compared to that found among English, Hungarian, Arabic, Malay, Swahili, and Chinese in the Old World.

No American Indian language is derived from an historically known Old World language. The affinities of the native languages of the Americas are presumed to reach back across the Bering Strait but date back to a very remote period in the past. Not even the closest of such relationships can yet be demonstrated conclusively, so great have the changes been over the many thousands of years since the ancestors of the Old and New World peoples drifted apart.

Aside from such genetic relationships presumed (but not demonstrated) to exist between American language families and some of the language families of Asia, attempts have often been made to identify specific words in various American Indian languages with more or less similar words in Old World languages, as evidence for pre-Columbian contacts across the Atlantic or Pacific. However, no such suggestions for prehistoric borrowings between the New and Old World languages have withstood critical examination of the evidence by qualified linguistic scientists.

Few North American Indian languages are culturally or politically important today. However, Guarani is one of the national languages of Paraguay (along with Spanish), and Nahuatl (Aztec) and various Mayan languages are the majority languages of extensive regions of Mexico and Guatemala as is Quechua in Peru, Ecuador, and Bolivia. In addition, Greenlandic Eskimo is one of the two official languages of Greenland (together with Danish).
and is used in all levels of local administration including the Greenland Parliament. Indian, Eskimo, and Aleut languages continue to be spoken in many communities. Indian language dictionaries and school curriculum materials have been produced in several Native American languages. Furthermore, American Indian languages have great scientific importance, and their study is a major concern of American anthropology. Because of the great diversity among these languages, they help us to understand the range of plasticity of human linguistic behavior and provide many independent cases for testing propositions about language in general. The study of Indian languages has also contributed greatly to improving the methods of linguistic science. New methods have had to be devised for studying purely spoken languages: only the Maya and to some degree the Aztec, Mixtec, and Zapotec languages in Mexico were written in pre-Columbian times. Among other things, such study has shown that unwritten languages do not change more rapidly than written ones.

Indian languages have contributed to the vocabulary of English and many other Old World languages, especially in words for animals, plants, and culture traits unknown to Europeans before their discovery of the New World. Such words include raccoon, coyote, squash, tomato, potato, tapioca, chocolate, tobacco, succotash, barbecue, hurricane, hammock, canoe, moccasin, totem, pow-pow, and many, many others, including a large number of place names.

SELECTED REFERENCES ON AMERICAN INDIAN LANGUAGES

The American Heritage Dictionary of the English Language, William Morris, editor, 1969. (Has the most complete etymologies given for the Indian origin of English words.)

Handbook of North American Indians, William C. Sturtevant, general editor. Washington, D.C.: Smithsonian Institution, 1978-. (A 20 volume encyclopedia summarizing knowledge about all Native peoples north of Mesoamerica, including linguistics. Each of the area volumes, 5-15, includes a chapter or chapters on the languages of that area.)

Random House Dictionary of the English Language, 2nd ed. unabridged. 1987. (The most complete and up-to-date etymologies of English words from American Indian languages.)

TEACHER BIBLIOGRAPHY

Basic Resources:

DIRECTORY OF NORTH AMERICAN INDIAN MUSEUMS AND CULTURAL CENTERS, 1981. (North American Indian Museums Association, 466 Third St., Niagara Falls, NY 14301.)

A useful description of the services and programs available at the growing number of Indian Museums in North America.

A guide to communities, cultures, and history of American Indians with a travel guide that includes dates of cultural and ceremonial events and a list of selected tribes and their addresses.

Very useful, but with some omissions and inaccuracies. Appendices include listing of Indian museums, organizations, and publications, helpful for those visiting Indian lands and museums.

A nearly complete listing of serious published accounts of Native American cultures. Organized by geographic area and by tribe. Tribal maps included.

Annotated bibliography for various areas and tribal groups. Each volume includes an introductory bibliographic essay with citations to the alphabetical listing of books which follows.

An encyclopedia summarizing knowledge about all Native peoples north of Mesoamerica, including cultures, languages, history, prehistory, and human biology. The standard reference work for anthropologist, historians, students, and the general public.

General Books:

In examining how the White image of the Indian "as separate and single other, developed and persisted over time, the author illuminates contemporary views if Indian people as well. The book analyzes the stereotypes and images developed through the centuries by settlers, intellectuals, writers, artists, and government leaders.

Comprehensive, detailed, densely factual, with numerous maps. Differs from all other modern treatments in being arranged by topic rather than by regions and cultures. Strong on technology, material culture, and social organization.

Unlike Josephy's PATRIOT CHIEFS which portrays war chiefs' resistance to White culture, Edmonds' book treats other leaders of heroic stature, reflecting the wide diversity of Indian leadership.

A collection of powerful archival and contemporary images illustrating American Indian ceremony, civil rights, and people and land. The accompanying texts consist of the words of those depicted in the photographs.

Popular account of the Indians of North, Central, and South America from the time of man's emergence in the New World through recent times. Some illustrations and a good bibliography. (Also for students)

Nine chapters, chronologically organized, revolve around Indian patriots such as Pontiac, Tecumseh, and Chief Joseph. Subjects from a wide selection of cultures, time periods, and geographic areas. (Also for students.)

A first-rate collection of case study essays with a focus on recent Indian history and the pattern of Indian-White relations.

Emphasis on the impact of European settlement on various tribal cultures. A popular introduction to American Indians.

A compendium of documents recording Indian-White relations over the past 500 years is told from the Indian perspective. Over 100 accounts, taken from a wide range of sources including traditional narratives, speeches, Indian autobiographies, reservation newspapers, personal interviews and letters, are included. This book is especially strong in its documentation of 20th century American Indian history.

NATIVE AMERICAN DIRECTORY: ALASKA, CANADA, AND THE UNITED STATES. 1982. Edited by Fred Synder. Published by the National Native American Co-Operative, P.O. Box 5000, San Carlos, AZ 85550-0301. (Directory of Native American events and organizations)

This college level textbook surveys archeology, historic and modern cultures, region by region, with selected tribes treated in more detail. Written by well-chosen specialists.

A brief historical summary from the viewpoint of Indian cultural development and Indian-Indian relations. Second half of the book is a collection of documents, divided into four sections: Indian History as seen by Indians, White Policy, White Viewpoints, Indian Prophets and Spokesmen. (Could be used by senior high school students as well.)

Amply illustrated volume. First part focuses on the Indian-White conflict in the East (1492-1850), second half deals with the Western battles, ending with the Battle of Wounded Knee in 1890.

Historical account focusing on the impact of European settlement on Indian cultures. Organized chronologically, from Colonial to modern times.

Prehistory:

A brief over-view of the American Indian cultures of the Potomac Valley from the Paleolndian to Woodland periods. Well written and readily understood.

Introductory college text emphasizing culture change through time. Separate chapters on Mexico, the Southwest, and the Arctic. Introductory chapter on archeological methods.

An amusing, readable survey of various pseudo-scientific (crackpot) theories about the origin of the American Indian, seen against the hard light of modern scientific evidence.

Modern Conditions:

An emotional, readable "narrative of the conquest of the American West as the victims experienced it."

Deloria is a Standing Rock Sioux who intelligently, bitingly, and Wittily attacks stereotypes and myths. In this book, Deloria discusses the Indians' plight vis-a-vis lawyers, anthropologists, government agents, religious missionaries, and Indian leaders.

An informative book that provides not only an historical perspective of Indians as urban dwellers but a personal perspective as well with Indian people relating their own experiences and responses to governmental policies that attempted to force their assimilation into white culture.

Seven essays written by American Indians examine contemporary American Indian identity. Among the topics are: adaptability and practicality of American Indians in their use of Country-Western dress and the pickup truck, the development of the middle class, American Indian Studies Programs, and the historian's role in using both non-Indian and Indian sources, some of which may be considered sacred information by the people.

Five Indian children living in Seattle describe their families, their foods, recreation, and values. The children come from families where one parent is Native American and the other may be Filipino, Samoan, Hawaiian, or Portuguese. A well-written book for elementary level that introduces children to the concept of diversity among contemporary, urban American Indians.

Sociological view of the contemporary American Indian situation seen in historical perspective.

**Special Topics and Culture Areas:**

The story of the Northern Cheyenne's fight to secure and preserve their land and culture against efforts to develop a coal-mining industry by powerful corporations. This case study is a good example of the complex relationship between the federal government (BIA) and the reservations.

A collection of poems, stories, and essays by contemporary Iroquois, some of whom are not professional writers. A variety of themes are evident including family, the environment, work, and art.

Unlike many books of this kind, it devotes significant space to modern life including U.S. Indian policies, urban Indians, the American Indian Movement, Indian identity, legal status, land claims, hunting and fishing rights, religious freedom, economic development, education, and powwows.

A description of American Indian music and its place in Indian culture. War chants, hunting songs, lullabies, courting songs, music for curing illness and for sowing crops are among the types discussed. Includes words and melodies for some songs, as well as instructions and diagrams for making a variety of musical instruments.

An engaging and personal account of the Indian occupation of Alcatraz. The author, one of the organizers of the occupation, describes the events that led up to the takeover, the role of the media, the factionalism that arose among the Indians involved, the removal, and the impact the invasion had on the public's understanding of Indian problems, on government policies regarding Indians, and on the renewal of Indian pride. Black and white photographs.

The story of the Taos Pueblo's 64 year battle with the U.S. Government to regain its rights to the sacred Blue Lake and surrounding wilderness. This was the first land claims case settled (1970) in favor of an Indian tribe based on freedom of religion.

Discusses the traditional roles of women in various American Indian societies and the effects of the European "invasion" upon them.

A collection of American Indian stories and poems. Each letter in the alphabet is represented by an object and theme relevant to American Indian culture (for example, bead, arrow, eagle, fetish), which is described through a combination of text, myth, poetry, and illustrations.

A retelling of a Zuni legend. Includes notes on the origin of the myth and explanations of the story's meaning in terms of Zuni symbolism and philosophy.

A collection of poems and essays written by young American Indians, organized around the themes of identity, family, homelands, ritual and ceremony, education, and "harsh realities." An excellent source for contemporary material on American Indian youth and their struggle to determine "what it means to be Indian today."

Best single source on the Indians of Southeastern United States comprehensive and readable.

A reliable, popular introduction to Plains culture by the outstanding scholar in this area.

A well-illustrated guide to indigenous North American plants and their uses in Native American healing.

Based on historical records and recollections of contemporary Indian women. Topics include childbirth, growing up, coming-of-age, marriage, women's economic roles, women and power, and women and war.

The author, a social anthropologist born and raised in the San Juan Pueblo, describes Tewa world view with the authority and sensitivity of a participant.

Ten tribes representing different geographic areas are described from the time of historic contact to extinction or to modern times.

A comprehensive, scholarly, and readable study that considers Navajo world view, the nature of man, pantheon, theory of disease, theory of curing, and ritual symbolism.

Describes the oral and written works that comprise the body of American Indian literatures. Comparisons and contrasts between European/American literature and American Indian literature are presented.

A collection of four amusing stories about the traditional American Indian trickster character, Coyote. The book attempts to educate the reader about the unique and sacred art of Native American storytelling.

A companion volume to Underhill's RED MAN'S AMERICA (see student bibliography). The approach is cross cultural, summarizing Indian beliefs, ceremonies, and religious practices throughout the continent. (Also for students.)

Thirty elders of the Hopi Indian tribe talk about their creation myth, legends, ceremonial cycles and their history.

Three beautifully written novellas focusing on the theme of brotherhood, among families and among Native peoples. Set in present-day Canada, the stories portray Native characters coping with personal problems as the death of a parent, a terminal illness, and dealing with the complex struggle of being Native in a White society.
**STUDENT BIBLIOGRAPHY**

**North American Indians**

Two new excellent published series now available are:

- *Indians of North America*, General Editor Frank W. Porter III. Chelsea House Publishers, Broomall, PA. Over 50 titles available on American Indian tribes as well as on specific topics such as *The Archaeology of North America* and *Literatures of the American Indian*, written by scholars. For a catalog, write: Chelsea House Publishers, Dept. CB2, P.O. Box 914, 1974 Sproule Rd., Suite 400, Broomall, PA 19008-0914. Also Chelsea House Publishers' Junior Library of American Indians.

- Alvin Josephy's Biographical Series on American Indians. Englewood Cliffs, NJ: SilverBurdett Press. Alvin Josephy, a noted historian, introduces each biography by explaining the purpose of the series, which is to help the reader understand how the Indians looked at the world.

A contemporary 15 year-old Eskimo boy describes daily life in his village in Greenland over the course of a year. Color photographs. Elementary level.

Short biographies of several dozen prominent American Indians, organized chronologically from the 18th century to the present. This unique book includes contemporary American Indians noted for their work in education, the arts, politics, law, and sports. Includes a lengthy bibliography and suggests videotapes.

Richly illustrated description of the Netsilik Eskimo living in the Pelly Bay region of Canada. Good background for the Netsilik Eskimo series of films. (see film section)

An engaging story about the problems faced by Papago Indians living in a ghetto in contemporary Tucson. The Papago perspective of nonsensical bureaucratic regulations in humorously depicted, and problems such as alcoholism, welfare-dependence, and single parent households are compassionately described in this unique work.

A story about a mute Indian, his life in the mountains, at a reservation school, as a rodeo rider and then as an adult. (jr.h.)

Autobiographical remembrances of the author's Cherokee boyhood living with his grandparents in the 1930's.

Ethnography focusing on changing patterns and conflicts on contemporary Eskimo life. (H.S.)

Craven, Margaret. I HEARD THE OWL CALL MY NAME. Dell, 1980.

A novel about traditional Kwakiutl Indian life and beliefs and the impact of outside technology and education. (Jr. & H.S.)

This book focuses on the pastoral aspects of this shepherding society pointing out the importance of females, the inviolability of the individual, the prestige of age, and the reciprocity principle.

Dozier is a native of Santa Clara Pueblo, New Mexico and an anthropologist. This case study on the Pueblo Indians is about a group of related peoples and their adaptation through time to their changing physical, socioeconomic, and political environments. It includes excellent sections on health and medicine, Katchina cults, world view, and symbolism.

Autobiographical reminiscences of the first 15 years of a young Sioux living on the plains in the 1870's and 1880's when traditional lifeways were still intact. Eastman describes his training, family traditions, tribal ceremonies, and legends.

Describes the Pueblo uprising against the government of Spain in 1680 with the Pueblo Indian perspective.

Biographies of six chiefs: Red Cloud (Oglala Sioux), Quanah Parker (Comanche), Washakie (Shoshone), Joseph (Nez Perce), Satanta (Kiowa), and Sitting Bull (Hunkpapa Sioux). Well-illustrated with archival photographs.

In this fictionalized account of Pocahontas' life, the author presents more probable explanations of events accepted by scholars. For example, what Captain John Smith perceived as his imminent execution may actually have been a ceremony that would have made him an adopted member of the tribe. This has led to the popular legend that Pocahontas saved Smith's life.

Story of a 13 year-old Eskimo girl caught between the old ways and those of the Whites, between childhood and womanhood. (Jr.H)

An upper class New England teenager goes to Barrow, Alaska to join an Eskimo whaling crew in the hope of find his uncle. He confronts many complex issues such as racism, Eskimo whaling rights, and Alaskan youth balancing traditional and modern Inupiat culture. Includes an Inupiat glossary and pronunciation guide.

A sympathetic account of the Cheyennes. Discusses ritual and tribal integration, social structure, world view, and Cheyenne personality. (H.S.)

A dramatic novel about the Canadian Eskimo with good ethnographic detail.

A 10 year-old girl relates the Cochiti Pueblo traditions she is learning from her extended family. Color photographs.

A modern Tsimshian boy narrates how his father, a noted Northwest Coast woodcarver, creates a totem pole for a local tribe. Color photographs.

A contemporary story of the daily life of a Yup’ik Eskimo family in a small Alaskan town on the Bering Sea, co-authored with a Yup’ik woman.

A collection of photographs of the World War II Navajo Code Talkers from the 1970s and 1980s, accompanied by brief quotes about the individual’s war experiences.

The Taos Indians attempts to resist Spanish then United States control of their sacred Blue Lake and their eventual victory. Black and white photographs of Taos Pueblo and people.

Describes the daily life of Timmy, a young San Ildefonso Pueblo boy, and how he straddles the modern world of computers and Walkmans and the traditional world of his people. Full color photographs. (lower elementary)

Moving story of a California Indian, sole survivor of the Stone Age, who entered the 20th century at the age of 50. Gives good historical background on the relationships and conflicts between the settlers and the California Indians. (H.S.)

This easy-to-read book explores traditional American Indian medicine people and healing practices. Illustrated with color and black and white photographs and paintings.

Good overview of Southwest Indian history, lifeways, ritual and religion, and the changes brought by contact with the Spanish, and later with reservation life.

An overview of the diversity of the traditional cultures of the Southeastern tribes with a discussion on the impact of contact and tribal efforts to preserve their cultures.

Emphasizing individual differences, McFee examines White-oriented form of adaptation and Indian-oriented adaption.

A young Navajo boy lives with his parents and his grandfather who represent modern and traditional views of life, respectively. He learns how he can contribute to both worlds.

A well-documented presentation of American Indian star myths.

Book of visions of a Plains Indian spiritual leader.

A poignant first-person story about Navaho life in the mid-1860's when they migrated against their will from their original homeland in Arizona to Fort Sumner, New Mexico. Includes descriptions of traditional rites-of-passage. (jr.h.)

Well-written account of tribal roots, lifeways, rituals, and history of the Indian tribes of the Plateau and Great Basin. A section on tribes today is included.

The story of the Apache wars and Geronimo's attempt to keep his people together despite encroaching European settlers. (elementary/secondary)

The life story of a Hopi woman.

A good, readable introduction to North American Indians with useful areal summaries. (H.S.)

A moving, first-person account by a nine-year-old Lakota boy accompanying more than 200 people on a reenactment of the journey made by Chief Big Foot and the Lakota from the Cheyenne River to the site of the Battle of Wounded Knee in 1890. Fine color illustrations. (elementary)

This book focuses not only on the igloo but also on the Arctic environment, traditional Eskimo clothing, food, games, transportation, family, and community life. (elementary/secondary)

The following is a selected list of American Indian autobiographies and oral histories:

Contemporary account of reservation life, Indian politics, traditional tribal ways, and growing up Sioux in the 1960s, 70s, and 80s.

An autobiography of an Inuit woman whose family is from the Mackenzie Delta district of Arctic Canada. Her story reveals the challenges faced by Native people adapting to a rapidly changing environment.

An autobiographical narrative by a Kiowa novelist and poet.

TEACHING KITS AND OTHER MATERIALS

Teaching Kits and Curricula:

Lesson plans cover the following topics: environment and resources, culture and diversity, change and adaptation, conflict and discrimination, and current issues for Native Americans. The last section, "Resources for Teachers and Students," includes criteria for evaluation educational materials and an "Indian Awareness Inventory" of 40 true or false questions.

THE NATIVE PEOPLE OF THE NORTHEAST WOODLANDS. An elementary curriculum produced by the National Museum of the American Indian, 1989. National Museum of the American Indian, Broadway at 155th St., New York, NY 10031; (212) 283-2420. $35.00

The Delaware (Lenape) and the Six Nations Iroquois are the focus of this curriculum in a three-ring binder notebook. Forty-seven classroom activities are found in lesson plans whose topics are: cultural diversity and environment, early times, language, hunting and fishing, harvest, family, oral traditions, clothing, government, life today. A resource section provides information on publications, audio-visuals, powwows, Native American supplies, and governments today.

Winner of the New York State Outdoor Education Association Annual Art and Literary Award (1990), this book combines Native American stories and environmental education activities to help students understand all aspects of the earth and to teach "positive social and environmental skills."

THE NATIVE AMERICAN SOURCEBOOK: A TEACHER'S RESOURCE OF NEW ENGLAND NATIVE PEOPLES by Barbara Robinson. Concord Museum, P.O. Box 146, Concord, MA 01742. Grades 1 & 2. $15 plus $3 postage and handling.

The sourcebook contains curriculum materials, teacher's guides, background information, activity sheets, extensive bibliography, and resource listing.

This 506 page resource manual covers the history of the Wabanaki, their government and politics, land and treaties, effects of the American Revolution, Indian-White relations, and contemporary life. Also included are 180 pages of lesson plans relating to the subject topics and readings of Wabanaki legends, stories from or about different periods in history from 1400 to the 1920's, and interviews with Wabanaki people today. The section, "Fact Sheets," covers information about material culture, political, social, and spiritual life, and games and crafts "to try." Also included are a resource listing and a bibliography.

Below are listed only films which can be highly recommended for junior high and high school students.

Prehistory/Archeology:

THE ODYSSEY SERIES. (DER) (annotations from ODYSSEY)

The Chaco Legacy. 59 min. 1980. (DER)

"Over 900 years ago the inhabitants of Chaco Canyon, New Mexico, undertook one of the most comprehensive building projects ever -- an extensive water-control system, a network of roads connecting 70 Pueblos, and several mammoth structures such as the 800-room Pueblo Bonito. How and why these people developed such a sophisticated technology is only now becoming clear after 50 years of study."

Myths and the Moundbuilders. 59 min. 1981. (DER)

"Centuries before the Spanish and French explored the Mississippi, American Indians along the vast interior river system had constructed huge earth mounds for burying and honoring their dead and for use as ceremonial centers. Myths about the moundbuilders abounded in the 19th century. But over the last 100 years researchers have begun to look closely at the mounds for clues to the prehistoric American who built them..."

Seeking the First Americans. 59 min. 1980. (DER)

"Archeologists from Texas to Alaska search for clues to identify of the first people to tread the American continent -- the early hunters who between 11,000 and 50,000 years ago crossed the Bearing Strait in Pursuit of game."

4 - Butte - 1: A Lesson in Archaeology. 33 min. 1968. (Penn)

Detailed excavation of a Maidu Indian village in California by a group of U.C.L.A. Faculty and students. Visually an exciting film to view.

Eskimo/Inuit:

The Alaskan Eskimo. (Alaska Native Heritage Film Project) Available from DER

Four films, now on video, documenting contemporary Alaskan Eskimo life, the integration of the new into the old. The films were made in the 1970's with the cooperation of the villages filmed.

At the Time of Whaling. color. 38 min.
From the First People. color. 45 min.
On the Spring Ice. color. 45 min.
Tununeremuit: The People of Tununak. color. 35 min.

Netsilik Eskimo Series (Penn)

A series of fine ethnographic films made in the 1960's as part of the school curriculum, Man, A Course of Study. The Netsilik Eskimo live in the Pelly Bay region of Northern Canada, and the films recreate life as it was in the early 20th century before major acculturation. The films have little narration, the action and natural sounds conveying the details of the scene. Emphasis is on the ecological adaptation and subsistence modes of the Netsilik. All films are in color and are 30 minutes each.

At the Winter Sea-Ice Camp: Parts 1-4 (midwinter)
At the Spring Sea-Ice Camp: Parts 1-3 (late winter)
Jigging for Lake Trout (late winter)
Stalking Seal on the Spring Ice: Parts 1-2 (spring)
Group Hunting on the Spring Ice: Parts 1-3 (spring)
Building a Kayak: Parts 1-2 (early summer)
Fishing at the Stone Weir: Parts 1-2 (midsummer)
At the Caribou Crossing Place: Parts 1-2 (early autumn)
At the Autumn River Camp: Parts 1-2 (late autumn)

Nanook of the North. 51 min. b/w. 1922. (Penn)
65 min. b/w. 1976, rev. ed.

Village of no River. 50 min. color. 1981. (Distributed by The Newark Museum, 49 Washington St., P.O. Box 540, Newark, NJ 07101.)

Film tells the story of a small Alaskan Eskimo Village of Kwigillingok and its people.

The Living Stone. 22 min. color. (Distributed by New York University Film Library, 26 Washington Place, New York, NY 10003.)

"An evocative picture of a spring and summer among a few Eskimo at Cape Dorset in Canada's eastern Arctic, showing the inspiration, often related to belief in the supernatural, behind their stone, ivory and bone carvings."

Eskimo Artist: Kenojuak. 20 min. (Penn)

Beautifully told story of Kenojuak, a Cape Dorset artist, whose words tell the poetic story of her life and art.

Subarctic:

Glooscap. 12 min. color. (NFB)

Beautiful visualization of the MicMac creation myth.

Paddle to the Sea. 28 min. color. (NFB)
Re-creation of the classic story of the journey of a carved Indian canoe from the headwaters of the St. Lawrence River to the sea.

Northeast:

Cree Hunters of Mistassini. 88 min; 59 min. version in film & video (DER)

Documentary on the subsistence hunting culture of the Cree Indians in James Bay area of Quebec. Follows three families on their hunting trip, and illustrates some of the conflicts between the old and the new ways.

Our Lives in our Hands. 49 min. color (DER)

This documentary examines split ash basketmaking as a means of economic and cultural survival for the Micmac Indians of northern Maine. This documentary of rural off-reservation Indian artisans aims at breaking down stereotypical images. First person commentaries are augmented by authentic 17th century Micmac music.

Northwest Coast:

The Loon's Necklace. 11 min. color. (Penn)

Dramatization of an Indian legend showing the Indians' sensitivity to the moods of nature.

Crooked Beak of Heaven. 52 min. color. (UCEMC) (part of The Tribal Eye Series)

A view of traditional ceremonies of the Gitksan, Haida, and Kwakiutl Indians of the Northwest Coast.

Box of Treasures. 28 min. color film & video (DER)

"In 1921 the Kwakiutl people of Alert Bay, British Columbia, held their last secret potlatch. Half a century later the splendid masks, blankets, and copper heirlooms that had been confiscated by the Canadian government were returned. The Kwakiutl built a cultural center to house these treasures and named it u'mista, 'something of great value that has come back.' This film is eloquent testimony to the persistence and complexity of Kwakiutl society today...."

Southwest:

Dinshvin. 22 min. (UCEMC)

Ethnographic narrative describing the many peoples who have lived in northwestern Arizona, especially the Navajo. Use of art to illustrate the myths and legends integral to the history of Canyon de Chelly and Mesa Verde.

Dineh: Portrait of the Navajo. 77 min. (UCEMC)

Film contrasts traditional Navajo life, family structure, and values with today's land disputes; entire narration by Navajos themselves.

Hopi. 58 min. (Distributed by Wayne Ewing Films, Box 32269, Washington, D.C. 20007.)

Excellent film focusing on contemporary problems as well as traditional life.
California:

Ishi in Two Worlds. 19 min. (Penn)

Story of Ishi, chief and last survivor of the Yahi tribe in California. Film is made from still photographs -- good to use with book by Theodora Kroeber (see student bibliography).

Modern Conditions:

Indian Self-Rule: A Problem of History. 58 min. videocassette (DER)

"The Indians of North America own less than 2% of the land first settle by their ancestors. This video traces the history of White-Indian relations from 19th century treaties through the present, as tribal leaders, historians, teachers, and other Indians gather at a 1983 conference organized to reevaluate the significance of the Indian Reorganization Act of 1934. The experience of the Flathead National of Montana, the Navajo Nation of the Southwest, and Quinault people of the Olympic Peninsula illustrate some of the ways Indians have dealt with shifting demands imposed upon them, from allotment to reorganization to termination and relocation. Particularly eloquent are Indian reflections upon the difficulties of maintaining cultural identities in a changing world and within a larger society that view Indians with ambivalence."
NATIVE AMERICAN QUESTIONS AND ANSWERS

Below are some answers to questions that visitors of all ages often ask when they explore the National Museum of the American Indian’s exhibition galleries.

How many Native Americans are registered with the census?
During the 20th century, the United States Indian population has risen dramatically from the low of 250,000 in 1890. According to the 1990 census, there are more than 1.5 million Native Americans living in the United States. California had the largest Indian population according to the 1980 census and Oklahoma the largest in 1990. More than 40 million indigenous people reside in Latin America and Canada.

Where do Native Americans live?
Today thousands of Indian people live in large and small cities as well as in rural communities. According to the 1990 census, about 12,000 live in New York City. Others live on tribal lands or reservations ranging in size from a few acres to many thousands of acres. The United States government defines a reservation as an area of land that has been reserved for Indian use. There are about 280 reservations in the United States and 1/3 of the Indian population lives on them. New York State includes ten reservations, eight of which are federally recognized.

On reservations, the federal government often supports social services such as schools, hospitals and clinics, and community centers. However, each community is different. Traditional political systems often included chiefs elected for life, but during the 19th and 20th centuries most tribes adopted elective governments. In recent years, tribes have worked towards the goal of self-government—taking control of all programs and services run by the federal government.

Were Native American languages written before European contact?
Languages were not written with an alphabet system prior to European contact, but important information was often recorded with the use of mnemonic (memory) devices such as pictographs. When Europeans arrived, as many as 2,200 Indian languages were spoken in the Western Hemisphere, but many have not survived. As a result of recent tribal efforts and concern, some languages are being taught in schools and preserved by being recorded. Today about 200 Indian languages are spoken north of the Mexican border and some are bilingual or trilingual, speaking their native language, and English, French, or Spanish. In Central and South America, more than 400 languages are still in existence.

What do people wear today?
Everyday dress is the same as other Americans—Indian students often wear jeans, t-shirts, and tennis shoes to school. Hair styles are usually the same as other students, however, some Indian people believe hair is sacred and they prefer to keep it long as a symbol of Indian identity. When native people attend powwows they often dress in their traditional regalia which can include elaborately decorated buckskin dresses and shirts, feather headdresses, moccasins, calico shirts decorated with ribbons, special feather fans, and silver and beaded jewelry.

How do people worship and work?
Today there are adherents of various Christian denominations as well as traditional Indian religions. People attend church of many different religions on the reservations. Many hold jobs in different types of professions—educators, lawyers, secretaries. Positions with the tribal governments, utility companies, and schools are among the possibilities on reservations. Some people manage businesses of their own.

What are powwows?
Social gatherings called powwows have evolved during the 20th century as important Indian events. These intertribal festivals are organized by Native Americans and serve to allow participants to affirm their Indian identity. Some travel thousands of miles to attend the social events which are scheduled throughout North America year round. The gatherings are usually open to the public and occur on weekends. Often included are special parades: dance and drum competitions: sporting events: booths of native foods, crafts, and other items for sale.

Which term, “Native American” or “American Indian,” is correct?
Opinion varies among native people concerning which of these general terms should be used. Some prefer Native American because they feel the term “Indian” is erroneous, referring to the arrival of Christopher Columbus who thought he had arrived in the “Indies” (at this time the Indies meant Asia). Others prefer the term “American Indian” because they feel Native American can refer to anyone born in the Americas including those of European or African descent. However, there is agreement on the use of specific tribal names such as Mohawk, Navajo, Yupik, and Aymara—they are much preferred by Indian people. Many groups also prefer special Indian names. The Navajo, for example, call themselves the Dineh (“the people”) and the Iroquois use Hodenosaunee (“people of the longhouse”). The Museum’s Education Department uses particular tribal or Indian names whenever possible, and both of the general terms—Native American and American Indian—in programs and publications when needed.
What are common American Indian stereotypes?

Probably the most common Indian stereotype consists of a Plains warrior, in full ceremonial regalia, atop a galloping horse. This visual image was probably first portrayed in the Wild West shows which traveled throughout the United States at the turn-of-the-century. Vaudeville shows, films, and, finally, television also adopted this commercialized representation. The Plains warrior image is not wholly inaccurate, but it is a stereotype because it portrays only a small segment of Native American culture. For example, most native people did not wear war bonnets and many traveled principally by foot or canoe. Other inaccurate stereotypes include telling students to sit "Indian style," the use of the word "how" as a greeting, and referring to drums as "tom-toms." Having an accurate understanding of the great variety of native cultures hemisphere-wide contributes to an important awareness of cultural diversity which should be stressed in educational programs.

How did the original people first come to the Americas?

Many Indian tribes recall their early history through stories which describe spirits ascending from the underground or from the sea into the present world and others tell of special supernatural beings descending from the sky. In these creation stories or oral traditions, the spirits often create "the people" after arriving in the present-day world.

Most scientists believe that the first Americans crossed a large land bridge connecting Siberia and Alaska perhaps as recently as 12,000 B.C. or as long ago as 40,000 B.C. The land bridge was so wide (about 1,000 miles) that the people crossing it probably had no idea they were traveling across a relatively small land area into a much larger one—they were hunters following game such as bison, wooly mammoths, and caribou. What is left of the land bridge today is known as the Bering Strait Islands, off the coast of Alaska.

What were American Indian homes like during historic times?

Homes were very different throughout the Americas. Climate and natural resources determined the materials and sometimes the structure of houses. Wood and bark, plentiful along the Northwest Coast of Canada and in the northeast, was often used to construct longhouses which held large extended families. In other areas, such as the grasslands of the plains, where wood was scarce, animal hides, especially those of the buffalo (more correctly bison), were used to make the portable tent or tipi homes needed for a hunting way of life. Some southwest houses were built of adobe bricks made from mud mixed with local grasses. In South America, Indian groups in the Amazonian rainforests constructed their longhouses of palm trees, while those living in the Andes mountains built their houses of wood and stone. The Inuit lived in igloos (which could be built of ice, snow, stone, skins, canvas, or sod) while the Florida Seminoles built grass-thatched huts known as chickees. Many of these house types, such as the chickees, tipis, and igloos, are still in use, at least for part of the year.

Home shapes varied; some of the more unusual forms included cone-shaped, rounded, and six-sided. Houses could be small (Great Lakes area wigwams held a single family) or very large (northeast longhouses accommodated 60 people or more). Tribes often had several different types of homes which were constructed according to the climate and season. The wide variety of homes is one example of the many different aspects of cultural diversity throughout the hemisphere.

How did the Museum acquire its collection?

Most of the artifacts were acquired by the Museum's founder, George Gustav Heye from the 1890's until the late 1950's. With family inheritances he financed field trips conducted by renowned archaeologists and ethnologists. Ethnologists usually purchased pieces from those that made or owned them while archaeologists usually found artifacts buried in sites. The collection grew rapidly and in 1916 Heye established the Museum. By the time he died in 1957, the collection numbered about a million objects. The artifacts represent Indian cultures from throughout the Western Hemisphere and span a time period of more than 10,000 years. The collection is the largest of its type in the world, and it continues to grow through donations and acquisitions.
ORIGIN OF THE AMERICAN INDIANS

The American Indians are physically Mongoloids and thus must have originated in eastern Asia. The differences in appearance of the various New World tribes in recent times are due to (1) the initial variability of their Asian ancestors; (2) adaptations over several millennia to varied New World environments; and (3) different degrees of mixing in post-Columbian times with people of European, African, and Asian origins. Differences from their relatives in northeastern Asia are also due to changes in the latter populations after the separation.

Bering Strait, where the Eastern and Western Hemispheres face one another across a narrow strip of water, is the most likely place for migrating groups to have crossed into the New World. There is not sufficient evidence for immigration via other routes before the Norse arrivals in Greenland and Newfoundland about A.D. 1,000, and if indeed any other early voyages occurred, they were insignificant for the origins and composition of New World populations.

Just when the Paleo-Indians—the first inhabitants of the Americas—entered the Americas is still under investigation. The prevailing theory calls for bands of interior hunters passing over the Bering Land Bridge, when sea levels were as much as 300 feet below at the end of the last Ice Age, and preceding through an "ice-free corridor" between the Laurentide and Cordilleran ice sheets to reach unglaciated lands to the south. Another theory calls for a coastal movement along the southern edge of the Land Bridge by early sea-adapted peoples. Certainly Paleo-Indians were well established south of the ice sheet by 12,000 years ago. Yet those probably were not the first arrivals. Sites and artifacts claimed to be older than this are gaining acceptance, but anything dated older than about 14,000 years ago, the date when rising sea levels submerged with Bering Land Bridge, separating Asia from the Americas, is still regarded with skepticism. However, some scholars do feel that humans were in North America at least by 20,000-25,000 years ago.

At no time, however, was the peopling of the New World a mass movement of people. More likely it was a trickle of small groups or bands entering from Asia over thousands of years. Among the last to arrive were the ancestors of the Eskimos who, settling along the Arctic coasts, effectively ended the migrations.

The following publications provide further details:

Meltzer, David J. "Why Don't We Know When the First People Came to North America?" *American Antiquity* 54(3):471-490.

Natural History magazine series of 14 articles on early man in the Americas that began November 1986.

Willey, Gordon R. *An Introduction to American Archaeology: North and Middle America*. Englewood Cliffs: Prentice-Hall, 1966. (Authoritative survey from the earliest prehistory to European colonization; now somewhat outdated.)

ANTHROPOLOGY OUTREACH
AND PUBLIC INFORMATION
DEPARTMENT OF ANTHROPOLOGY
NATIONAL MUSEUM OF NATURAL HISTORY
SMITHSONIAN INSTITUTION
1991
ERASING NATIVE AMERICAN STEREOTYPES

How can we avoid stereotypes about Native Americans when we are teaching, selecting textbooks, or designing exhibits and public programs?

Cultural institutions reflect current issues of society. Both museums and schools are wrestling with new sensitivities and concerns with cultural diversity. For instance, at a recent Smithsonian symposium on Contemporary American Indian Art, several Native American artists asked why their paintings and sculpture are rarely shown at fine arts museums, but are more likely to be exhibited at anthropology and natural history museums. Native American artists also question why their work is not combined with other American artists' work in shows on American art (Kaupp, 1990).

In directing an alternative school for Native American children in Chicago, June Sark Heinrich found many misnomers and false ideas presented by teachers as they instructed students about the history and the heritage of Native peoples. She devised ten classroom "don'ts" to help teachers correct these common errors. The D'Arcy McNickle Center for the History of the American Indian at the Newberry Library in Chicago recently began designing a sample checklist for evaluating books about American Indian history.

This AnthroNotes Teacher's Corner combines the two approaches. The questions that follow provide teachers and museum educators with ways to evaluate their own teaching and criteria to evaluate the materials they use.

1. Are Native Americans portrayed as real human beings with strengths and weaknesses, joys and sadnesses? Do they appear to have coherent motivations of their own comparable to those attributed to non-Indians?

2. In books, films, comic strips and curriculum materials, do Native Americans initiate actions based on their own values and judgments, rather than simply react to outside forces such as government pressure or cattle ranchers?

3. Are stereotypes and clichés avoided? References should not be made to "obstacles to progress" or "noble savages" who are "blood thirsty" or "child-like" or "spiritual" or "stoic". Native Americans should not look like Hollywood movie "Indians," whether Tonto from the Lone Ranger days or Walt Disney's recent portrayals. Native Americans are of many physical types and also have European, African or other ancestry. Just as all Europeans or African-Americans do not look alike, neither do Native Americans.

Heinrich urges that television stereotypes should not go unchallenged. For example, "when Native Americans fought, they were thought more 'savage' than the Europeans and were often less so. Help children understand that atrocities are a part of any war. In fact, war itself is atrocious. At least, the Native Americans were defending land they had lived on for thousands of years. If Native Americans were not 'savage warriors,' neither were they 'noble savages.' They were no more nor less noble than the rest of humanity."

Television, especially old movies, often portrays the "Indian" speaking only a few words of English, often only "ugh." Yet anthropologists have carefully documented the complexity of Native American
languages. At least 350 different languages were spoken in North America when William Bradford and the rest of the Puritans first stepped ashore in Massachusetts. Stereotypes can be defused if teachers check their own expressions and eliminate those such as "You act like a bunch of wild Indians" or "You are an Indian giver." In a similar way, do not use alphabet cards that say A is for apple, B is for ball, and I is for Indians. It may seem trivial, but Heinrich argues that such a practice equates a group of people with things.

4. If the material is fiction, are the characters appropriate to the situations and are interactions rooted in a particular time and place? If they are, a particular group such as the Navajo or Chippewa living at a specific moment in history will be more likely to be brought accurately to life.

5. Do the materials and the teacher's presentation avoid loaded words (savage, buck, chief, squaw) and an insensitive or offensive tone?

6. Are regional, cultural, and tribal differences recognized when appropriate? As everyone knows but does not always put into practice, before the Europeans came there were no people here that called themselves "Indians." Instead, there were and still are Navajo or Menominee or Hopi, or Dakota, or Nisqually, or Tlingit, or Apache. Instead of teaching about generalized Indians or "Native Americans," study the Haida, or Cree, or Seminole.

7. Are communities presented as dynamic, evolving entities that can adapt to new conditions, migrate to new areas, and keep control of their own destinies? Too many classroom materials still present Native American traditions as rigid, fixed, and fragile. For example, some filmstrips and books may have titles like "How the Indians Lived," as though there are not any Indian people living today. In fact, over two million Native Americans live in what is now the United States, about half of them live in cities and towns and the other half on reservations or in rural areas.

8. Are historical anachronisms present? The groups living here prior to the 1540's did not have horses, glass beads, wheat, or wagons. Can your students determine why that is the case and do they understand that these items were all introduced by Europeans?

9. Are captions and illustrations specific and appropriate for a specific time and place? (Wrapped skirts in the Arctic, feather bonnets in the North Pacific Coast, or totem poles in the Plains never existed.) Are individuals identified by name when possible?

10. Are the different Native Americans viewed as heirs of a dynamic historical tradition extending back before contact with Europeans? Similarly, Native American groups should not be equated with other ethnic minorities. The fact is that Native American tribes—by treaty rights—own their own lands and have other rights that are unique to the descendants of the real Natives of America, because they are that. No other minority within the United States is in a similar legal position. Native peoples view themselves as separate nations within a nation. U.S. laws and treaties, officially endorsed by U.S. presidents and the Congress, confirm that status.

11. If you have Native American children in your class, do not assume that they know all about their own ancestry and the ancestry of all Native Americans. All children including Native American children need to be taught about the Native American heritage, which, in a very real sense, is the heritage of everybody living in the U.S. today. Culture and ideas, after all, are learned and not inherent from birth.

TEACHING ACTIVITY

Instructions for NORTH AMERICAN MYTHS AND LEGENDS

1. Divide the class into six groups and assign each group one story. Each group chooses a leader.

2. Members of each group read the story silently taking notes on details which reflect: a) the natural environment; b) the relationship between the human and nonhuman world; c) explanations of natural phenomena; d) values of the society; e) special roles within the society; f) view of the supernatural.

3. Each group discusses its myth for 10 minutes using the above categories as a guide.

4. Whole class convenes. Each group leader reads his/her story aloud and summarizes the group’s ideas about the story. The classroom teacher can add other relevant details to more fully illuminate meaning and significance of the story.

5. Optional: Teacher might end the activity by reading the King James version of Genesis to illustrate all peoples have creation stories to explain origins. Also that the Judeo-Christian tradition has parallels to other stories such as the Earthmaker. These parallels should provide interesting class discussion.
CREATION STORY (Netsilik Eskimos-Canada)

In the earliest times on earth, there were no animals in the sea. People did not need blubber for fires, because newly drifted snow would burn. Great forests grew on the bottom of the sea. From them came the pieces of driftwood that still wash up on our shores. In those days, there was no ice on the sea. This is a distant memory of the time when the first people lived on the earth.

Everything was in darkness then. The lands and the animals could not be seen. Both men and animals lived on earth, but there was no difference between them. Men could become animals and animals could become men, and they all spoke the same language.

In the very earliest times, men were not as good as hunters are today, and their weapons were few. So they had little food, and sometimes they had to eat the earth itself. Everything came from the ground, and people lived on the ground. They did not have all the rules to follow that we do today. There were no dangers to threaten them, but there were no pleasures either.

That was the time when magic words were made. Suddenly a word would become powerful and could make things happen, and no one could explain why. It was always dark until once a hare and a fox had a talk. "Darkness, darkness," said the fox. He wanted to steal from caches in the darkness. "Day, day," said the hare. He wanted the light of day so he could find a place to feed. And suddenly day came, for the hare's words were more powerful than the fox's. Day came, and was replaced by night, and when night had gone, day came again.

In those early times there were only men and no women. There is an old story that tells how women came from men. One time the world collapsed and was destroyed, and great showers of rain flooded the land. All the animals died, and the world was empty. Then two men grew up out of the earth. They married, for there was no one else, and one man sang a song to become a woman. After a while they had a child, and they were the first family.

In those early ages, women often could not have children so the earth had to help. Women went out searching for children who had grown up out of the earth. A long search was needed to find boys, but there was no need to go far to find girls. This is the way the earth gave children to the first people, and in that way they became many.

(Theodore Raven, compiler. THIS WORLD WE KNOW: BELIEFS AND TRADITIONS OF THE NETSILIK ESKIMO. Cambridge, MA: Education Development Center, 1967.)

THE SHAMAN IN THE MOON (Bering Sea Eskimos-Alaska)

A Malamut shaman from Kotzebue Sound near Selawik Lake told me that a great chief lives in the moon who is visited now and then by shamans who always go to him two at a time, as one man is ashamed to go alone. In the moon live all kinds of animals that are on the earth, and when any animal becomes scarce here the shamans go up to the chief in the moon and, if he is pleased with the offerings that have been made to him, he gives them one of the animals that they wish for, and they bring it down to the earth and turn it loose, after which its kind becomes numerous again.

The shaman who told me the foregoing said he had never been to the moon himself, but he knew a shaman who had been there. He had been up only as high as the sky, and went up that high by flying like a bird and found that the sky was a land like the earth, only that the grass grew hanging
downward and was filled with snow. When the wind blows up there it rustles the grass stems, loosening particles of snow which fall down to the earth as a snowstorm.

When he was up near the sky he saw a great many small, round lakes in the grass, and these shine at night to make the stars. The Malemut of Kotzebue Sound also say that the north wind is the breath of a giant, and when the snow falls it is because he is building himself a snow house and the particles are flying from his snow shovel. The sound wind is the breath of a woman living in the warm southland.

HOW THE SUN CAME (Cherokee)

There was no light anywhere, and the animal people stumbled around in the darkness. Whenever one bumped into another, he would say, "What we need in the world is light." And the other would reply, "Yes, indeed, light is what we badly need."

At last the animals called a meeting and gathered together as well as they could in the dark. The red-headed woodpecker said, "I have heard that over on the other side of the world there are people who have light."

"Good, good!" said everyone.

"Perhaps if we go over there, they will give us some light," the woodpecker suggested.

"If they have all the light there is," the fox said, "they must be greedy people, who would not want to give any of it up. Maybe we should just go over there and take the light from them."

"Who shall go?" cried everyone, and the animals all began talking at once, arguing about who was the strongest and ran fastest, who was best able to go and get the light.

Finally the 'possum said, "I can try. I have a fine big bushy tail, and I can hide the light inside my fur."

"Good! Good!" said all the others, and the 'possum set out.

As he traveled eastward, the light began to grow and grow, until it dazzled his eyes, and the 'possum screwed his eyes up to keep out the bright light. Even today, if you notice, you will see that the 'possum's eyes are almost shut, and that he comes out of his house only at night.

All the same, the 'possum kept going, clear to the other side of the world, and there he found the sun. He snatched a little piece of it and hid it in the fur of his fine bushy tail, but the sun was so hot it burned off all of the fur, and by the time the 'possum got home his tail was as bare as it is today.

"Oh, dear!" everyone said. "Our brother has lost his fine bushy tail, and still we have no light."

"I'll go," said the buzzard. "I have a better sense than to put the sun on my tail. I'll put it on my head."

So the buzzard traveled eastward till he came to the place where the sun was. And because the buzzard flies so high, the sun-keeping people did not see him, although now they were watching out
for thieves. The buzzard dived straight down out of the sky, the way he does today, and caught a piece of the sun in his claws. He set the sun on his head and started for home, but the sun was so hot that it burned off all his head feathers, and that is why the buzzard's head is bald today.

Now the people were in despair. “What shall we do? What shall we do?” they cried. “Our brothers have tried hard; they have done their best, everything a man can do. What else shall we do so we can have light?”

They have done the best a man can do,” said a small voice from the grass, “but perhaps this is something a woman can do better than a man.”

“Who are you?” everyone asked. “Who is that speaking in a tiny voice and hidden in the grass?”

“I am your Grandmother Spider,” she replied. “Perhaps I was put in the world to bring you light. Who knows? At least I can try, and if I am burned up it will still not be as if you had lost one of your great warriors.”

Then Grandmother Spider felt around her in the darkness until she found some damp clay. She rolled it in her hands, and molded a little clay bowl. She started eastward, carrying her bowl, and spinning a thread behind her so she could find her way back.

When Grandmother Spider came to the place of the sun people, she was so little and so quiet no noticed her. She reached out gently, and took a tiny bit of the sun, and placed it in her clay bowl. Then she went back along the thread that she had spun, with the sun's light growing and spreading before her, as she moved from east to west. And if you will notice, even today a spider's web is shaped like the sun's disk and its rays, and the spider will always spin her web in the morning, very early, before the sun is fully up.

“Thank you Grandmother,” the people said when she returned. “We will always honor you and we will always remember you.”

And from then on pottery making became woman's work, and all pottery must be dried slowly in the shade before it is put in the heat of the firing oven, just as Grandmother Spider's bowl dried in her hand slowly, in the darkness, as she traveled toward the land of the sun.

CREATION OF THE ANIMAL PEOPLE (Okanogan - S.W. Oregon)

The earth was once a human being. Old-One made her out of a woman. “You will be the mother of all people,” he said.

Earth is alive yet, but she has been changed. The soil is her flesh; the rocks are her bones; the wind is her breath; trees and grass are her hair. She lives spread out, and we live on her. When she moves, we have an earthquake.

After changing her to earth, Old-One took some of her flesh and rolled it into balls, as people do with mud or clay. These balls Old-One made into the beings of the early world. They were the ancients. They were people, and yet they were at the same time animals.
In form, some of them were like the animals; some were more like people. Some could fly like birds; others could swim like fishes. In some ways the land creatures acted like animals. All had the gift of speech. They had greater powers and were more cunning than either animals or people. And yet they were very stupid in some ways. They knew that they had to hunt in order to live, but they did not know which beings were deer and which were people. They thought people were deer and often ate them.

Some people lived on the earth at that time. They were like the Indians of today except that they were ignorant. Deer also were on the earth at that time. They were real animals then too. They were never people or ancient animal people, as were the ancestors of most animals. Some people say that elk, antelope and buffalo also were always animals, to be hunted as deer are hunted. Others tell stories about them as if they were ancients of half-human beings.

The last balls of mud Old-One made were almost all alike and were different from the first ones he made. He rolled them over and over. He shaped them like Indians. He blew on them and they became alive. Old-One called them men. They were Indians, but they were very ignorant. They did not know how to do things. They were the most helpless of all creatures Old-One made. Some of the animal people preyed on them and ate them.

Old-One made both male and female people and animals, so that they might breed and multiply. Thus all living things came from the earth. When we looked around, we see everywhere parts of our mother.

Most of the ancient animal people were selfish, and there was much trouble among them. At last Old-One said, "There will soon be no people if I let things go on like this."

So he sent Coyote to kill all the monsters and other evil beings. Old-One told Coyote to teach the Indians the best way to do things and the best way to make things. Life would be easier and better for them when they were no longer ignorant. Coyote then traveled on the earth and did many wonderful things.

HOW COYOTE GOT HIS SPECIAL POWER (Okanogan - S.W. Oregon)

In the beginning of the world, Spirit Chief called a meeting of all the animal people.

"Some of you do not have names yet," he said when they had gathered together. "And some of you do not like the names you have now. Tomorrow, before the sun rises I will give a name to everyone. And I will give each an arrow also."

"Come to my lodge as soon as the darkness is gone. The one who gets there first may choose the name he wants and I will give him the longest arrow. The longest arrow will mean that he will have the most power."

As the people left the meeting, Coyote said to his friend Fox, "I'm going to be there first. I don't like my name. I want to be called Grizzly Bear or Eagle."

Fox laughed. "No one wants your name. You may have to keep it."

"I'll be there first," repeated Coyote. "I won't go to sleep tonight."

That night he sat by his fire and stayed awake for a long time. Owl hooted at him. Frog croaked
in the marshes. Coyote heard them all. But after the stars had closed their eyes, he became very sleepy. His eyelids grew heavy.

"I will have to prop my eyes open."

So he took two small sticks and propped his eyelids apart. "Now I can stay awake."

But soon he was fast asleep, and when he awoke, the sun was making shadows. His eyes were dry from being propped open, but he ran to the lodge of the Spirit Chief.

"I want to be Grizzly," he said, thinking he was the first one there. The lodge was empty except for Spirit Chief.

"That name is taken, and Grizzly Bear has the longest arrow. He will be chief of the animals on the earth."

"Then I will be Eagle."

"That name is taken, and Eagle has the second arrow. Eagle will be the chief of the birds."

"Then I will be Salmon."

That name is taken, and Salmon has the third arrow. Salmon will be the chief of all the fish. Only the shortest arrow is left, and only one name—Coyote."

And the Spirit Chief gave Coyote the shortest arrow. Coyote sank down beside the fire of the Spirit Chief. His eyes were still dry. The Spirit Chief felt sorry and put water in his eyes. Then Coyote had an idea.

"I will ask Grizzly Bear to change with me."

"No," said Grizzly, "I cannot. Spirit Chief gave my name to me."

Coyote came back and sank down again beside the fire in the big lodge. Then Spirit Chief spoke to him.

"I have special power for you. I wanted you to be the last one to come. I have work for you to do, and you will need this special power. With it you can change yourself into any form. When you need help, call on your power."

"Fox will be your brother. He will help you when you need help. If you die, he will have power to bring you to life again."

"Go to the lake and get four tules. Your power is in the tules. Then do well the work I will give you to do."

So that is how Coyote got his special power.

WINNEBAGO INDIAN CREATION STORY

In the beginning Earthmaker was alone. Earthmaker was sitting in space when he came to consciousness. Nothing was to be found anywhere. He began to think of what he was to do and finally he cried. Tears flowed from his eyes and fell below where he was sitting. After a while he looked below and saw something bright. The bright objects were tears, of which he had not been aware and, which falling below, had formed the present waters. They became the seas of today.

Then Earthmaker began to think again. He thought, "Thus it is whenever I wish anything. Everything will become the water of the seas." So he wished for light and it became light. Then he thought, "It is as I have supposed; the things that I wished for, come into existence as I desired." Then he again thought and wished for this earth and the earth came into existence. Earthmaker looked at the earth and he liked it, but it was not quiet. It moved about as do the waves of the sea. Then he made the trees and he saw that they were good. But even these did not make the earth quiet. It was however almost quiet. Then he created the four cardinal points and the four winds. At the four corners of the earth he placed them as four great and powerful spirits, to act as weights holding down this island earth of ours. Yet still the earth was not quiet. Then he made four large beings and threw them down toward the earth and they were pierced through the earth with their heads eastward. They were really snake-beings. Then it was that the earth became still and quiet. Now he looked upon the earth and he liked it.

Again he thought of how things came into existence as he desired. So he spoke: "I shall make a man like myself in appearance." So he took a piece of earth and made it like himself. Then he talked to what he had created but it did not answer. He looked at it again and saw it had no mind or thought. So he made a mind for it. But again it did not answer. Then he made it a tongue. Then he talked to it again but it did not answer. So he looked at it and he saw that it had no soul. So he made it a soul. He talked to it again and then it very nearly said something but could not make itself intelligible. So Earthmaker breathed into his mouth and talked to it and it answered.
